

Crowne Plaza Terrigal is now a mySmart Hotel

2009 saw Crowne Plaza Terrigal embark on an ambitious plan to refurbish the hotel and bring the Crowne Plaza hotel into the 21st century using smart technologies to reduce the hotels impact on our environment as well as introduce a higher level of guest service and care. Crowne Plaza Terrigal has achieved the internationally recognised “Green Globe Bronze” rating - a world wide benchmark in environmental sustainability.

Crowne Plaza Terrigal installed the **mySmart Hotel** room control system which intelligently controls the air conditioning in each guest room. The Smart Digital Thermostat is very easy and intuitive to use and provides huge savings in energy use.

Smart Digital Thermostat

A unique feature of the **mySmart Hotel** Smart Digital Thermostat is the **ECO mode Green Button** which allows guests to voluntarily choose to become involved in the Hotel’s sustainability program by saving additional energy in the room during their stay and operating the air conditioning automatically at optimal efficiency.

All the hotel rooms have a view over the ocean and a balcony

Crowne Plaza Terrigal is nestled on the beach overlooking the serene waters of Terrigal Beach on the Central Coast of NSW, a soothing place to unwind and relax, the hotel caters to the needs of predominantly the leisure traveller.

Carbon Emission Reduction Savings

To date the energy savings have created a large reduction in carbon emissions of over 100 tonnes each month.

100 tonnes of carbon emission reduction each month equates to 1,200 tonnes each year. This is the same as removing over 400 cars from our roads for a period of one year.

x 400 off road for one year

or

x 2,000,000 (50gm CO²) balloons removed from our atmosphere
